

1. select *
2. from resourcetbl
3. where rate between 10 AND 20
4. order by rate;

The screenshot shows a database query tool interface. The top bar includes a 'Start Page' button, a 'SaiSirisha' tab, and a toolbar with icons for various functions. The 'Query Builder' tab is active, displaying the following SQL query:

```
select *  
from resourcetbl  
where rate between 10 AND 20  
order by rate;
```

Below the query editor, the 'Script Output' tab shows the execution results. The task completed in 0.047 seconds. The results are displayed in a table with two columns: 'RESNO' and 'RESNAME'. The data is as follows:

RESNO	RESNAME
R100	attendant
R102	usher
R105	food service
R103	nurse
R104	janitor
R101	police

At the bottom of the results, it states '6 rows selected'.
